

This graphic is designed up help you understand your options when choosing a training class at Synergy Dog Sports.

Essential Skills 1 is for teams new to performance event training, regardless of other types of training. In this class, we also introduce our training philosophies and values, and determine your team's suitability for performance events like agility and obedience.

After completion of Essential Skills 1, teams have the option to move onto Essential Skills 2, Agility Obstacles 1, Agility Handling 1, or TEAM Classes.

Moving through the different levels and class types requires completion of certain classes or instructor approval. Instructors are open to evaluations and assessments for any team that is uncertain of where they should begin.

Our classes are based on skill level within our curriculum, not on competition or experience level. Each team will be treated equally when evaluating skills for class placement.

Our handling classes are based on OneMind Dogs methods and your class placement is based on experience with the OneMind Dogs methods.

Some levels have several different classes at that level. Please refer to our class list and class schedule to determine what appropriate class will be available for you next.

Students are encouraged to move between levels and categories, continuing to work on a variety of skills. Don't be afraid to retake a class as well; instructors are always learning new and exciting things to share with our students!
